

# Have you had your Cervical Screening?

All women and people with a cervix between the ages of 25 - 64 should go for regular cervical screening. Cervical cancer can often be prevented by attending cervical screenings, which aim to find and treat changes to cells before they turn into cancer.

## Are you struggling to attend your cervical screenings due to:

- Childcare
- Gender Identity
- Ongoing or past abuse
- Anxiety
- Cultural Beliefs
- Not sure what to expect
- Disability

## We can support you!

Whatever the reason, together we can discuss how best to support you, in a **safe and confidential space**, with you in control of what is discussed.

If you would like to make an appointment to discuss support for getting your cervical screening, you can contact a Social Prescriber. We're non-medical professionals who support people in the community to improve their health and wellbeing. **To reach out to us, please call our voicemail and leave your name, your GP surgery and that you wish to discuss cervical screening.**
